

autolamps®
All our products are Registered designs/Patent Pending

Car makers worldwide are replacing globes with LEDs wherever possible because of their superiority over the incandescent globe, however costs of LEDs have been too high for most applications but with time and new technology the LEDs will be affordable for every application. LED Autolamps have come up with an alternative array of LED lighting products that

can save you up to 60% compared with other brands. Our aim is to make LED products affordable to everybody not just the select few. Other manufacturers have failed to realize that good looks are just as important as quality. We are the only manufacturer to offer you the same design lens for both tail lamps and marker lamps.

We have our bases in a variety of color's. We are also very proud that our marker lamps

are the brightest available, and with a dome shape that only protrudes 19mm making them very difficult to damage once secured. All these products have no visible screws making them hard for thieves to steal, they come with 40cm hard wired into an epoxy resin and are 100% waterproof, shockproof, vibration resistant, and with 100,000 hours rated LED's. All you have to do is fit and forget.

Various Voltages Available

80 Available in 12v and 24volt
100 Available in 12v, 24volt & multi-volt
125 Available in 12v, 24volt & multi-volt
