

Alzone Racking Parts

Product for Metal Roofs

- Easy-Rail**
- most economical solution for metal roofing
 - use where array follows existing roof angle.
 - suitable for corrugated, Trimdeck and Clip-Lock roofing materials
 - array can be in portrait or landscape
 - no specialized tools required
 - no feet required
 - reduced installation time

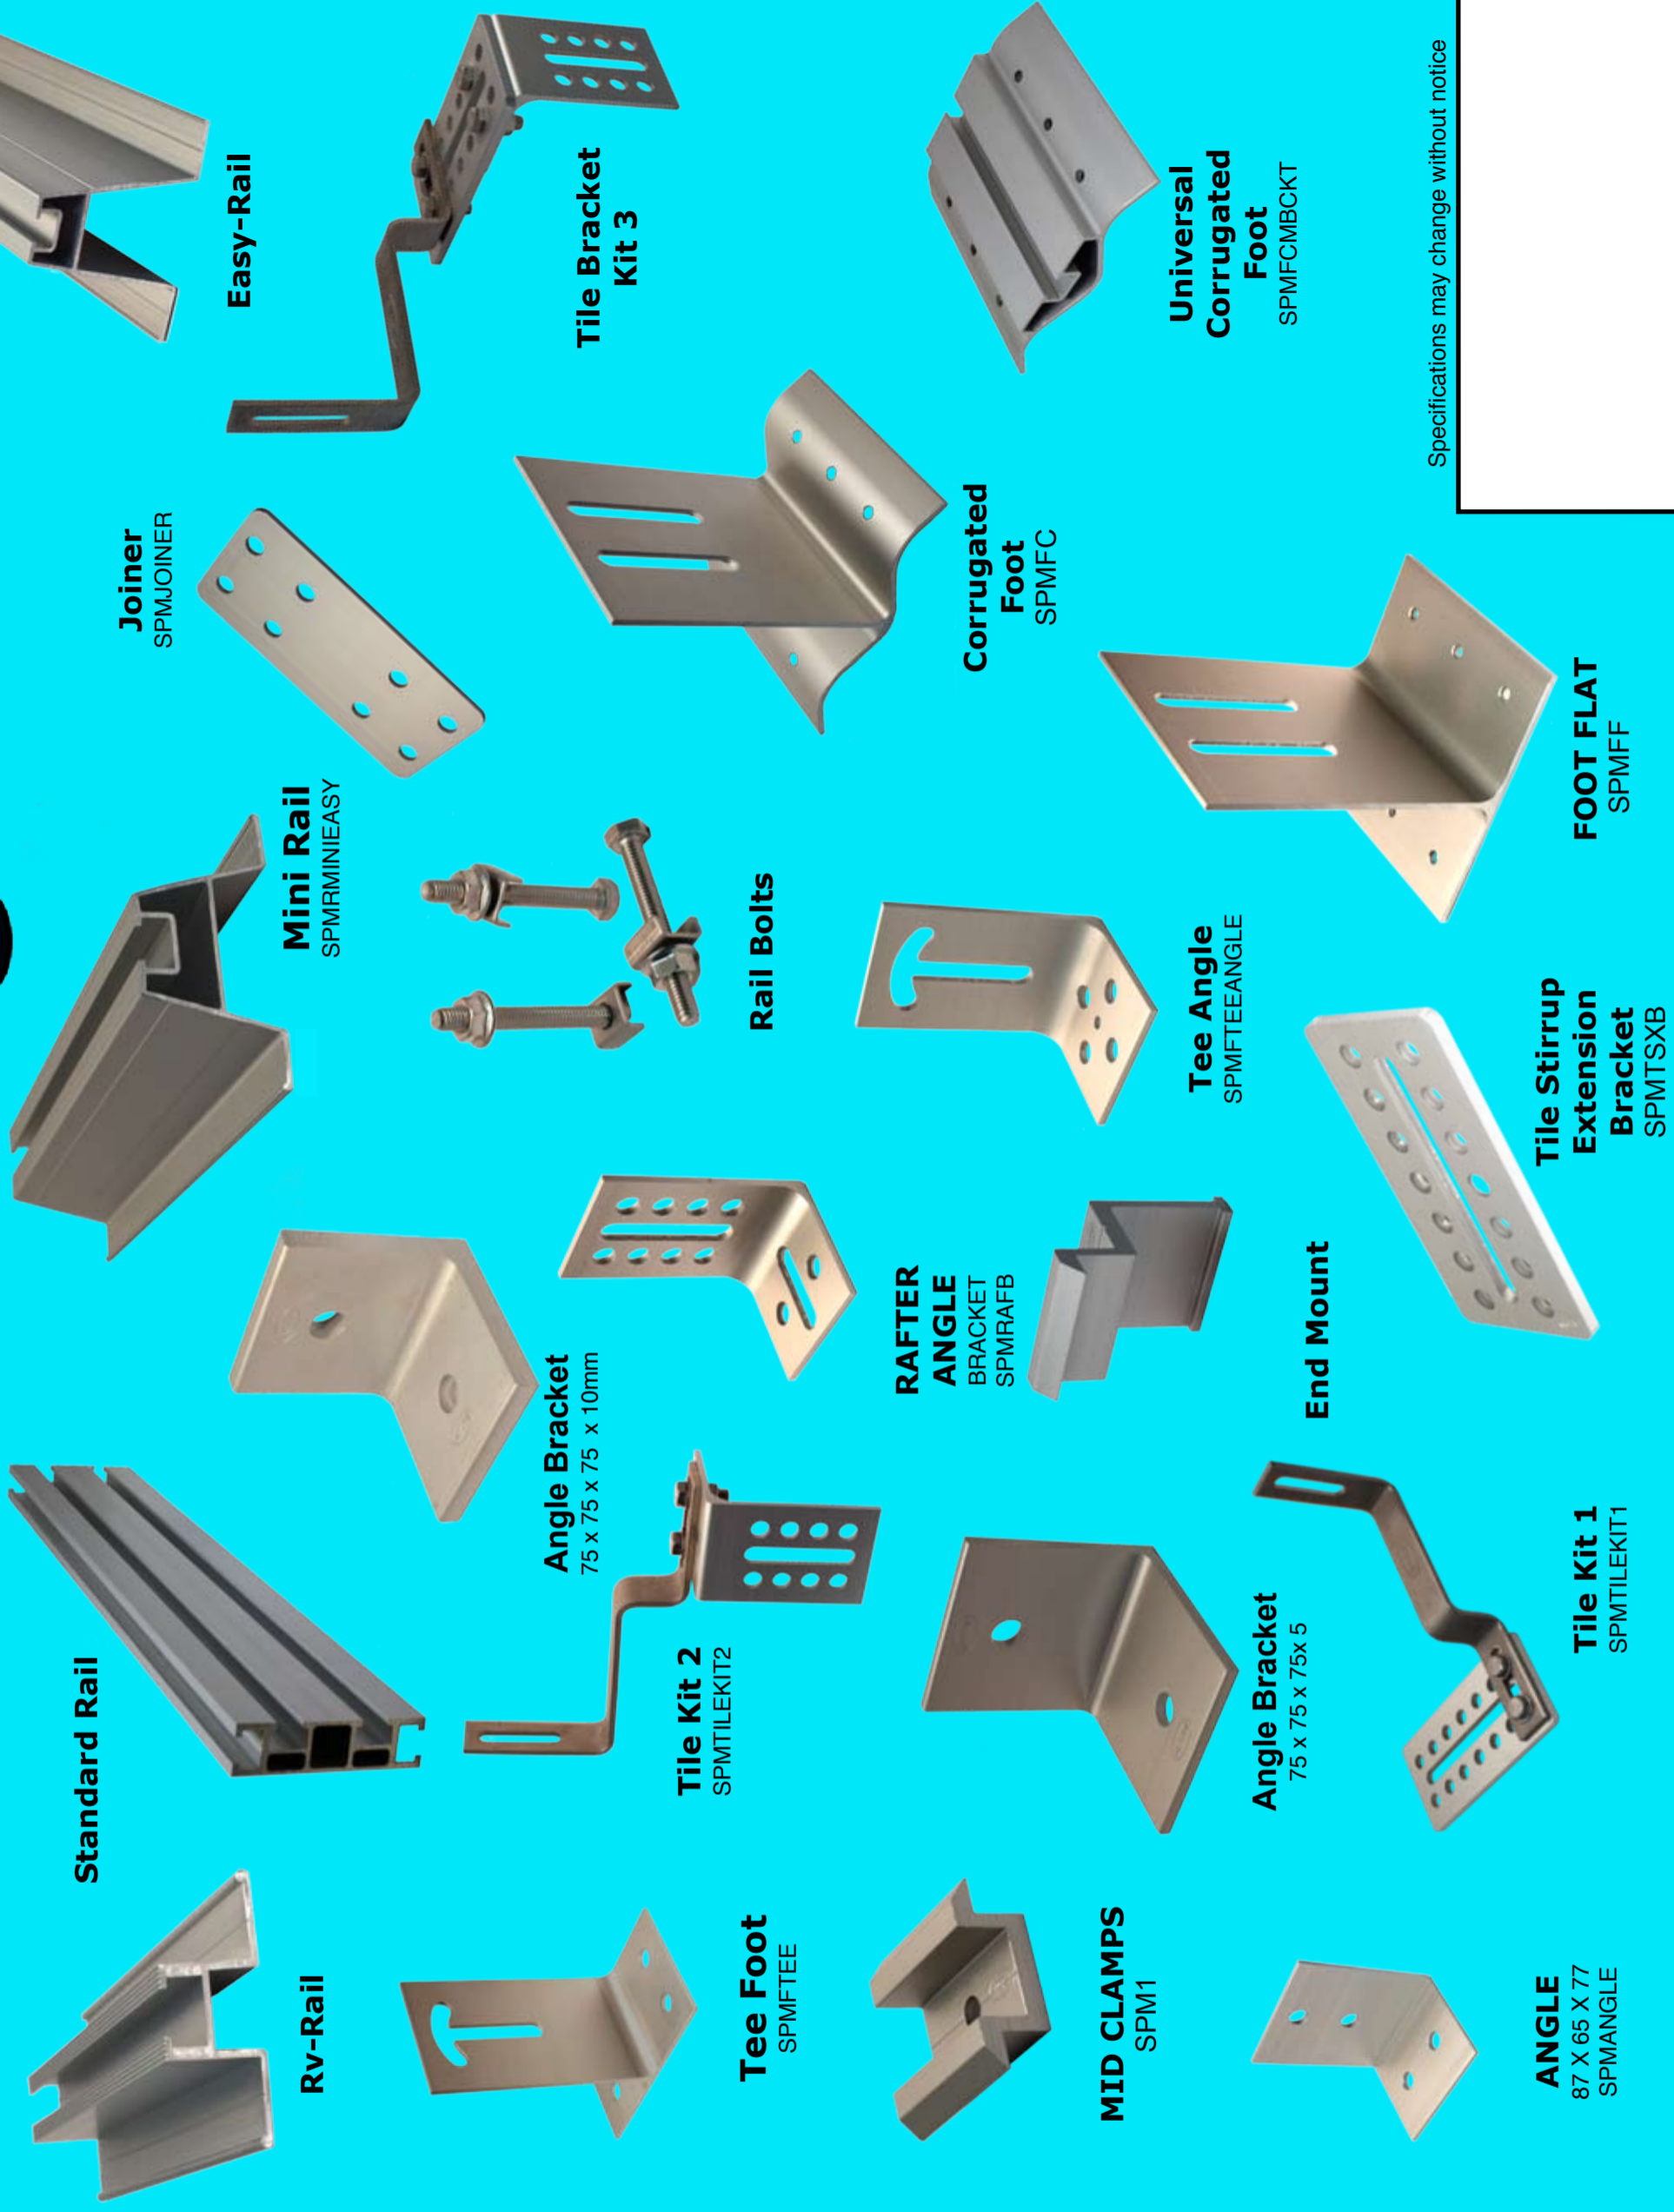

- Standard Rail!**
- suitable for corrugated, Trimdeck and Clip-Lock roofing systems
 - array can be in portrait or landscape
 - flat or corrugated feet available for differing roofing materials
 - Universal Corrugated Foot can be used to change angle in relation to the direction of corrugation
 - Angle Bracket allows flexibility in array position
 - raised arrays available in suitable locations

Product for Tiled Roofs

- Standard Rail**
- three Tile Kits are available to suit most installations
 - Tile Kit 1 is secured to the top of the rafter
 - Tile Kit 2 and 3 are secured to the side of the rafter
 - stainless steel stirrup and bolts are included with Tile Kits

Ground Mounts

- Standard Rail**
- Designed for all Australian wind zones including cyclone areas
 - no specialized tools required
 - pre drilled for easy installation
 - heavy duty feet available for cyclonic regions
